

Contents INTERCOH-1984

A.J. Mehta, 1986, Estuarine Cohesive Sediment Dynamics, Springer Verlag, Lecture Notes on Coastal and Estuarine Studies, Vol 14, ISBN 3-540-96296-4.

M.M. Nichols, Effects of fine sediment resuspension in estuaries.	5
J.T. Wells and G.P. Kemp, Interaction of surface waves and cohesive sediments: field observations and geologic significance.	43
R.B. Krone The significance of, aggregate properties to transport processes.	66
J.R. Hunt, Particle aggregate breakup by fluid shear.	85
D.J.A. Williams, Rheology of cohesive suspensions.	110
T.N. Burt, Field settling velocities of estuary muds.	126
K. Kranck, Settling behaviour of cohesive sediment.	151
A.M. Teeter, Vertical transport in fine-grained suspension and newly-deposited sediment.	170
G.C. Sills and D.McG. Elder, The transition from sediment suspension to settling bed.	192
R. Ariathurai and K. Arulanandan, An electrical method to measure in-situ sediment densities.	206
E. Partheniades, A fundamental framework for cohesive sediment dynamics.	219
C.L. Montague, Influence of biota on erodibility of sediments.	251
W.R. Parker, On the observation of cohesive sediment behaviour for engineering purposes.	270
A.J. Mehta, Characterisation of cohesive sediment properties and transport Processes in estuaries.	290
E.J. Hayter, Estuarial sediment bed model.	326
Y.P. Sheng,	

Modelling bottom boundary layer and cohesive sediment dynamics in estuarine and coastal waters.	360
J.N. Suhayda, Interaction between surface waves and muddy bottom sediments.	401
A.D. Kirwan, Jr, A review of mixture and non-local continuum mechanics with example applications to cohesive sediments.	429
W.H. McAnally, Jr, Cohesive sediment research at the waterways experiment station	456
A.J. Mehta, Summary	467
