

Contents INTERCOH-1991

A.J. Mehta, 1993, Nearshore and Estuarine Cohesive Sediment Transport, American Geophysical Union, Coastal and Estuarine Studies, Vol 42, ISBN 0-87590-256-1.

M.M. Nichols, Response of coastal plain estuaries to episodic events in the Chesapeake Bay region.	1
W. Lick and H. Huang, Flocculation and the physical properties of flocs.	21
E. Partheniades, Turbulence, flocculation and cohesive sediment dynamics.	40
K. Kranck, E. Petticrew, T.G. Milligan and I.G. Droppo, In situ particle size distributions resulting from flocculation of suspended sediment.	60
W. van Leussen and J.M. Cornelisse, The role of large aggregates in estuarine fine-grained sediment dynamics.	75
O.W.H. Wai, K.W. Bedford and M. Abdelrhman Long-term structural variations in suspended sediment profiles.	92
R.B. Krone, Sediment revisited.	108
H.-T. Chou, M.A. Foda and J.R. Hunt, Rheological response of cohesive sediments to oscillatory forcing.	126
J.W. Lavelle, A model for estuarine sedimentation involving marine snow.	148
E.A. Toorman and J.E. Berlamont, Mathematical modelling of cohesive sediment settling and consolidation.	167
H. Verbeek, C. Kuijper, J.M. Cornelisse and J.C. Winterwerp, Deposition of graded natural muds in The Netherlands.	185
P.D. Scarlatos and A.J. Mehta, Instability and entrainment mechanisms at the stratified fluid mud-water interface.	205
A.J. Mehta and R. Srinivas, Observations on the entrainment of fluid mud by shear flow.	224
N. Mimura, Rates of erosion and deposition of cohesive sediments under wave action.	247
J.P.-Y Maa, VIMS Sea carousel: its hydrodynamic characteristics.	265
T. Kusuda, R. Watanabe, T. Futawatari and H. Yamanishi, Fluid mud movement on an inclined bed.	281

J.C. Winterwerp, J.M. Cornelisse and C. Kuijper, A laboratory study on the behaviour of mud from the Western Scheldt under tidal conditions.	295
M. Schünemann and H. Kühl, Experimental investigations of the erosional behaviour of naturally formed mud from the Elbe estuary and adjacent Wadden Sea, Germany.	314
S.A. Jenkins, S. Aijaz and J. Wasyl, Transport of fine sediments by hydrostatic jets.	331
C.L. Montague, M. Paulic and T.M. Parchure, The stability of sediments containing microbial communities: initial experiments with varying light intensity.	348
R.W. Faas, H.A. Christian, G.R. Daborn and M. Brylinsky, Biological control of mass properties of surficial sediments: an example from Starr's Point Tidal Flat, Minas Basin, Bay of Fundy.	360
R. Kirby, R.J. Bleakley, S.T.C. Weatherup, P.J. Raven and N.D. Donaldson, Effect of Episodic events on tidal mud flat stability, Ardmillan Bay, Strangford Lough, Nothern Ireland.	378
C.E. Adams, Jr, J.T. Wells and Y.-A. Park, Wave motions on a lutocline above a stably stratified bottom boundary layer.	393
A.M. Teeter, Suspended transport and sediment-size transport effects in a well-mixed, mesotidal estuary.	411
N.V.M. Odd, M. Bentley and C.B. Waters, Observations and analysis of the movement of fluid mud in an estuary.	430
R.A. Luettich, Jr., J.T. Wells and S.-Y. Kim, In situ variability of large aggregated: preliminary results on the effects of shear.	447
P. Le Hir, P. Bassoullet and J. L'Yavanc, Application of a multivariate transport model for understanding cohesive sediment dynamics.	467
A.P. Diserens, M.C. Ockenden and E.A. Delo, Application of a mathematical model to investigate sedimentation at Eastham Dock, Mersey Estuary.	486
T. Futawatari and T. Kusuda, Modelling of suspended sediment transport in a tidal river.	504
W. Puls and J. Sündermann, Modelling the distribution of suspended matter and of lead in the North Sea.	520
Y. Onishi, H.C. Graber and D.S. Trent, Preliminary modelling of wave-enhanced sediment and contaminant transport in New Bedford Harbour.	541
Y.P. Sheng, Hydrodynamics, sediment transport and their effects on phosphorus dynamics in Lake Okeechobee.	558
