

## Contents INTERCOH-2009

Susana B. Vinzon, Ashish J. Mehta and Johan C. Winterwerp, *Ocean Dynamics*, Vol 61, No 2-3, March 2011

Susana B. Vinzon, Ashish J. Mehta and Johan C. Winterwerp  
Editorial 155-156

Michael P. Fettweis and Bouchra Nechad  
Evaluation of in situ and remote sensing sampling methods for SPM concentrations, Belgian continental shelf (southern North Sea) 157-171

Mick van der Wegen, Ali Dastgheib, Bruce E. Jaffe and Dano Roelvink  
Bed composition generation for morphodynamic modeling: case study of San Pablo Bay in California, USA 173-186

Thomas Vijverberg, Johan Christian Winterwerp, Stefan Gert Jan Aarninkhof and Hans Drost  
Fine sediment dynamics in a shallow lake and implication for design of hydraulic works 187-202

Johan C. Winterwerp  
Fine sediment transport by tidal asymmetry in the high-concentrated Ems River: indications for a regime shift in response to channel deepening 203-215

Seyed Abbas Haghshenas and Mohsen Soltanpour  
An analysis of wave dissipation at the Hendijan mud coast, the Persian Gulf 217-232

Robert Kirby  
Minimising harbour siltation—findings of PIANC Working Group 43 233-244

Denise Knoch and Andreas Malcherek  
A numerical model for simulation of fluid mud with different rheological behaviors 245-256

Francesca Mietta, Claire Chassagne, Romaric Verney and Johan C. Winterwerp  
On the behavior of mud floc size distribution: model calibration and model behavior 257-271

Marcel G. Moura, Valeria S. Quaresma, Alex C. Bastos and Paulo Veronez Field observations of SPM using ADV, ADP, and OBS in a shallow estuarine system with low SPM concentration—Vitória Bay, SE Brazil	273-283
Laura Edith Grecco, Eduardo Alberto Gómez, Sandra Elizabeth Botté, Ángel Omar Marcos and Jorge Eduardo Marcovecchio, et al. Natural and anthropogenic heavy metals in estuarine cohesive sediments: geochemistry and bioavailability	285-293
Mohsen Soltanpour and Farzin Samsami A comparative study on the rheology and wave dissipation of kaolinite and natural Hendijan Coast mud, the Persian Gulf	295-309
Andrew James Manning, John V. Baugh, Jeremy R. Spearman, Emma L. Pidduck and Richard J. S. Whitehouse The settling dynamics of flocculating mud-sand mixtures: Part 1—Empirical algorithm development	311-350
Jeremy R. Spearman, Andrew J. Manning and Richard J. S. Whitehouse The settling dynamics of flocculating mud and sand mixtures: Part 2—numerical modelling	351-370
Leicheng Guo and Qing He Freshwater flocculation of suspended sediments in the Yangtze River, China	371-386
Wim van Leussen Macroflocs, fine-grained sediment transports, and their longitudinal variations in the Ems Estuary	387-401
